2. A depot is located at approximately two kilometers west of Dolno Kamartsi (N 42-43, E 23-52), on the side of a hill and starting from the road to Sofia. This depot consists chiefly of piles of lumber in the open and under sheds and is always guarded by troops.

3. To the east of a military training ground located in Shumen (now Kolarovgrad), there is a fuel depot which runs along a railway line and includes three fuel tanks placed upright and two in a horizontal position. The tanks are aluminium in color and have the capacity of a fuel truck. This is not a military depot since it is not guarded.[1] 25X1

1 Comment: In a previous report the route of 25X1
the railway line was shown erroneously and should be correctly placed to the south of the training ground, parallel to the highway.
